ABOUTUS

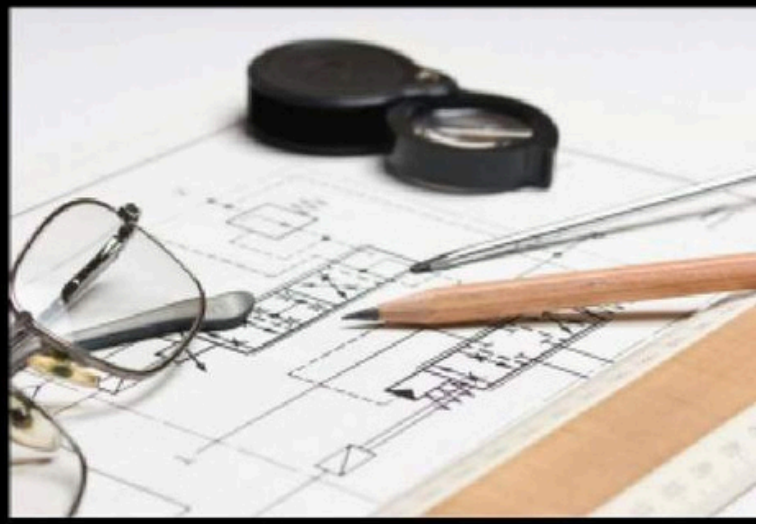

SR Infra India Pvt.Ltd is a diversified construction company, headquartered in Bangalore, Karnataka, India. Since its inception in 2004, the company has been constantly making a statement in construction and interior market through its innovative and technical capabilities supported by a solid financial foundation. The company has built numerous landmark projects in different sectors.

The company always strike a desired balance between modern designs and contemporary life standards. Eachproject is a landmarkinitsown right, sought after foritsstriking architecture,wellplannedinteriorsand lasting constructionstandards.Each project isthe outcomeofdeep-rooted professionalinsight and inputs of our teamofexperts andconsultants associated withthe projects.

Resource & Time

At “SR Infra India Pvt.Ltd”, we have the optimum amalgamation of people, experience and professionalism to give life to one's imagination. We serve our clients with Quality Construction which adds value to their projects. Time Standards are followed to produce construction of high standard. We work in close co-ordination with our Clients, Consultants & Architects and offer cost & time saving solutions in both pre and post construction stages.

Ours is a transparent policy with a honest approach and long term vision. The company has proven success in the field of providing efficient construction projects and related services to client's satisfaction. Hence, we are Time Tested and Trusted!

Quality & Commitment

We treat every project as vital to the company's successful growth and sustainability. Hence, in every contract, the Directors to Managers to Staff- all get involved and pay meticulous attention to all details. From the tendering stage, project's construction designs are interrogated and innovative solutions proposed. These are coupled with detail Engineering exercises undertaken with a view to cut down costs and enhance value.

The company has a professionally qualified management structure. Our Project Managers are empowered to make decisions and are given total responsibility of the project. They enjoy the full support and have free access to the resources of the Head Office.

Our system has successfully developed totally integrated solutions for successful management of the Four major Project Variables:

- Materials
- Documents
- Progress
- Cost

Human Values

MAXIMISING VALUE

Our overhead burden is low compared to the Industry norms and we maintain a modest Head Office. We utilize the services of the Best in class consultants for their valuable advice in areas like geo-technical, marine works, specialized construction solutions, concrete design, modern cladding technology, etc., with a provide Value added solutions to the Clients.

- **Reliability:** We provide and deliver precision services-timely
- **Co-operation:** We want to grow with our employees & associates
- **Innovation:** We stay one step ahead...always!
- **Products:** We offer our customers exactly what they need
- **Environment**
  Technology: We protect our enviroment
- **Trust:** We believe in customer satisfaction
- **Efficiency:** We help to lower construction costs & reduce time
- **Safety:** All the above is possible only if SAFE working practices are adopted
- **Team-work:** We work as a TEAM to meet the highest requirements

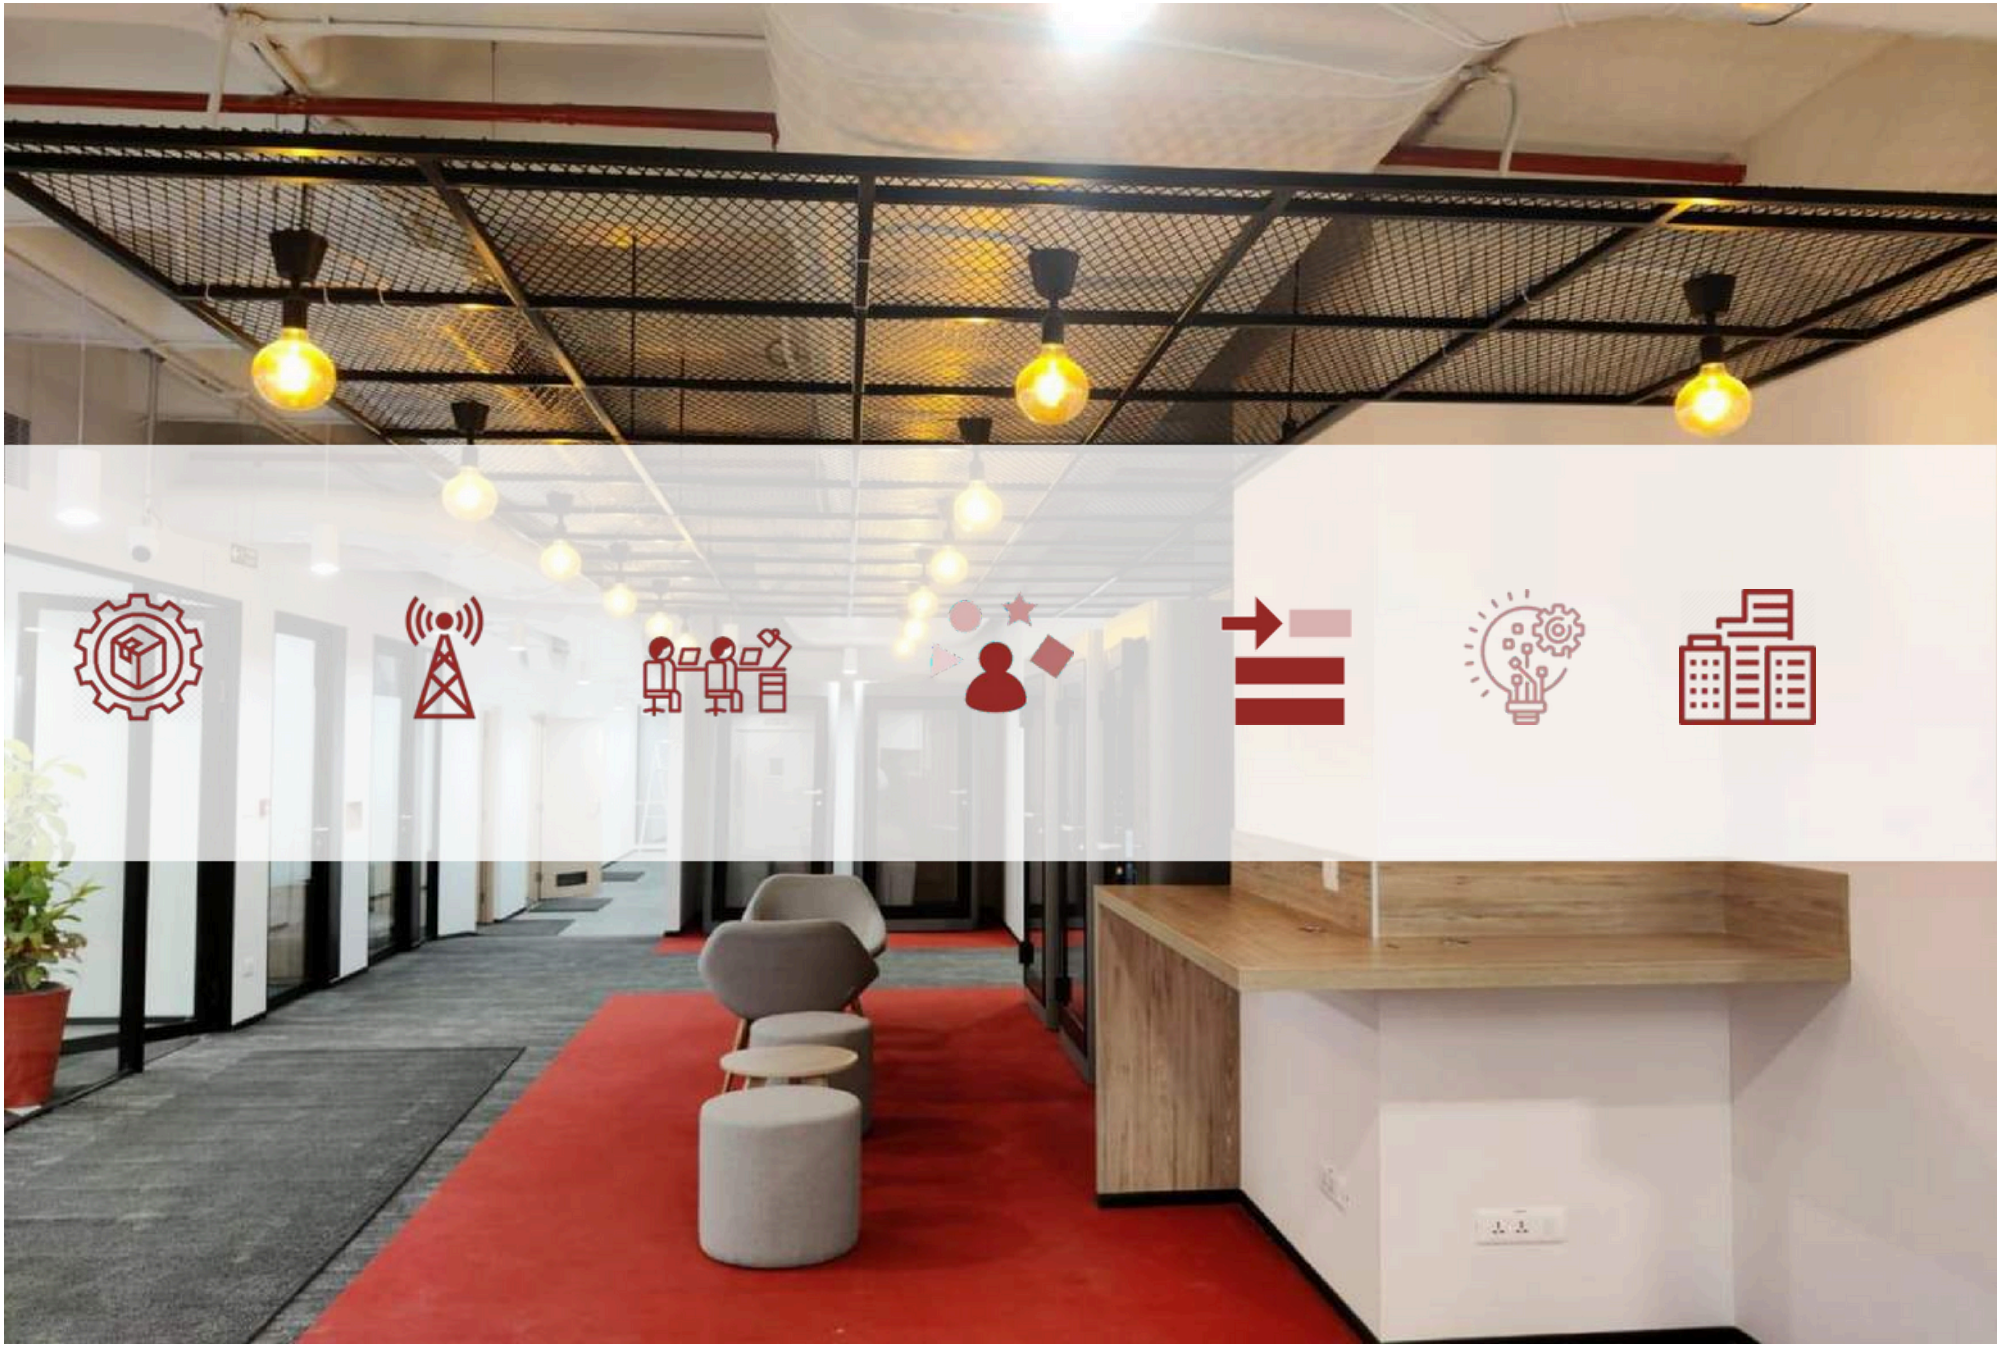

Trust: We believe in customer satisfaction
